

Mushrooms On Stamps

Paul J. Brach

For this presentation I chose the species for their occurrence in our 5 county region surrounding Rochester, NY. My intent is to show our stamp collecting audience that an artist's rendition of a fungi species depicted on a stamp could be used akin to a guidebook for the study of mushrooms. Most pages depict a photograph and related stamp of the species, along with an edibility icon. Enjoy... but just the edible ones!

Scientific Name	Edibility	Page(s)
<i>Amanita gemmata</i>	Poisonous	3
<i>Amanita inaurata</i>	Not Recommended	4-5
<i>Amanita muscaria</i> v. <i>formosa</i>	Poisonous (hallucinogenic)	6
<i>Amanita pantherina</i>	Deadly Poisonous	7
<i>Amanita phalloides</i>	Deadly Poisonous	8
<i>Amanita rubescens</i>	Not Recommended	9-11
<i>Amanita virosa</i>	Deadly Poisonous	12-14
<i>Aleuria aurantiaca</i>	Edible	15
<i>Sarcocypha coccinea</i>	Edible	16
<i>Phlogiotis helvelloides</i>	Edible	17
<i>Leccinum aurantiacum</i>	Good Edible	18
<i>Boletus parasiticus</i>	Not Recommended	19
<i>Cantharellus cibarius</i>	Choice Edible	20
<i>Cantharellus cinnabarinus</i>	Choice Edible	21
<i>Coprinus atramentarius</i>	Poisonous	22
<i>Coprinus comatus</i>	Choice Edible	23
<i>Coprinus disseminatus</i>	Edible	24
<i>Clavulinopsis fusiformis</i>	Edible	25
<i>Leotia viscosa</i>	Harmless	26
<i>Langermannia gigantea</i>	Choice Edible	27
<i>Lycoperdon perlatum</i>	Good Edible	28-29
<i>Entoloma murraii</i>	Not Recommended	30
<i>Morchella esculenta</i>	Choice Edible	31-32
<i>Russula rosacea</i>	Not Recommended (bitter)	33
<i>Laetiporus sulphureus</i>	Choice Edible	34
<i>Polyporus squamosus</i>	Edible	35

Choice/Good

Edible

Harmless

Not Recommended

Poisonous

Deadly Poisonous

Amanita gemmata
(jeweled deathcap)

Amanita inaurata
(gilded grisette)

Amanita inaurata
(gilded grisette)

Amanita muscaria var. *formosa*
(fly agaric)

Amanita pantherina
(panther mushroom)

Amanita phalloides (death cap)

Amanita rubescens (blusher)

Amanita rubescens (blusher)

Amanita rubescens (blusher)

Amanita virosa (destroying angel)

Amanita virosa
(destroying angel)

Amanita virosa (destroying angel)

Aleuria aurantiaca (orange peel fungus)

Sarcoscypha coccinea (scarlet cup fungus)

Phlogiotis helvelloides (apricot jelly fungus)

Leccinum aurantiacum
(red-cap scaber stalk)

Boletus parasiticus (parasitic bolete)

Cantharellus cibarius (chanterelle)

Cantharellus cinnabarinus
(cinnabar-red chanterelle)

Coprinus atramentarius (alcohol inky)

Coprinus comatus (shaggy mane)

Coprinus disseminatus (fairy helmets)

Clavulinopsis fusiformis (yellow spindles)

Harmless

Leotia viscosa (green-headed jelly club)

Langermannia gigantea (giant puffball)

Lycoperdon perlatum (gem-studded puffball)

Lycoperdon perlatum (gem-studded puffball)

Entoloma murraili (yellow unicorn)

Morchella esculenta
(common (yellow) morel)

Morchella esculenta (common (yellow) morel)

Laetiporus sulphureus (sulfur polypore)

Polyporus squamosus (dryad's saddle)
